KARAN PAREEK

Full Stack Developer | MERN Stack | Cloud-Native & AI
karanpareek174@gmail.com | +91 8101482088 | LinkedIn | GitHub | Portfolio

SUMMARY

Full Stack Developer (BCA, 2027) who builds and ships MERN-stack applications end to end: REST API design, authentication and access control, real-time systems with WebSockets, Docker and Kubernetes deployment, and LLM/AI integration. Built a self-hosted Git server on the Smart HTTP protocol, a multi-tenant career-placement platform, and a team MCP gateway on Kubernetes with Helm. Strong in DSA and OOP. Co-founded Ignitia Digital and delivered 6+ live client websites and web applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C
Core CS: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)
Frontend: React, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, Fastify, Spring Boot, FastAPI, REST APIs, WebSockets (Socket.io), JWT Authentication, RBAC, PHP
Databases: MongoDB, MySQL, SQL
DevOps & Tools: Docker, Kubernetes (k3d/k3s), Helm, Traefik, Git/GitHub, Postman, Shell Scripting, Vitest, Playwright
AI / LLM: Claude API, Gemini API, OpenAI API, Model Context Protocol (MCP), LLM Integration, RAG, Prompt Engineering, Cursor, Antigravity, Looping

PROJECTS

Conduit | *Kubernetes, Helm, MCP, React, Fastify, MongoDB, Gemini*

- Built a team MCP (Model Context Protocol) gateway on Kubernetes (k3d/k3s, Helm) that aggregates upstream MCP servers behind one authenticated Streamable HTTP endpoint, with tool routing, name-collision handling, per-call timeouts and circuit breakers so a dead upstream never breaks the others.
- Wrote a custom WooCommerce MCP server (REST adapter) and a React dashboard with an LLM chat agent that calls tools as the logged-in user; every call is recorded in an audit log. Same Helm charts run locally and on a k3s VPS via values files.
- Secured with RBAC, hashed revocable API keys, SSRF guard, rate limiting and NetworkPolicies; tested with Vitest and Playwright.

GitStack | *MERN, Node.js, Docker, Git Smart HTTP*

- Built a self-hosted GitHub clone on a real bare-Git storage engine; git clone, push and pull work directly from the CLI via the Smart HTTP protocol.
- Implemented Issues, Pull Requests with merge-conflict detection and auto-merge, code review, and a social feed.
- Hardened repository access control against path-traversal attacks; containerized and deployed with Docker.

SkillBridge | *React, TypeScript, Spring Boot, FastAPI, MySQL, OpenAI*

- Built a multi-tenant career-placement platform for students, recruiters and colleges: React 19 + TypeScript frontend and a Java 17 Spring Boot backend with Spring Security JWT filters, JPA/Hibernate and MySQL.
- Added a FastAPI microservice using OpenAI structured outputs to score resumes against a skills taxonomy and suggest fixes; also built a recruiter hiring pipeline, coding arena and timed skill assessments.

ReconcileAI | *React, Node.js, MongoDB, Claude/Gemini*

- Built an AI-driven finance reconciliation system for the Razorpay AI Buildathon 2026 that breaks lumped payment-gateway settlements into order-level GST and fee breakdowns.
- Designed a 3-tier matching engine with human-in-the-loop approvals and an immutable audit log.

EXPERIENCE

Co-Founder, Ignitia Digital *Nov 2025 – Present*

- Designed, developed and deployed 6+ client websites and web applications across e-commerce, immigration and education, owning each project from requirements to launch.
- Built with React, Node.js and MongoDB: product catalogs, admin panels, WhatsApp-based checkout flows, and responsive UIs; handled hosting, deployment and ongoing maintenance.
- Implemented on-page and technical SEO (meta tags, page structure, performance) as part of every delivery.

Participant, Razorpay AI Buildathon 2026 (AI Finance Controller track)

- Built ReconcileAI, a 3-level settlement reconciliation pipeline (MERN + Claude API, Gemini fallback) with human approvals.

Participant, Code for Communities Hackathon, GDG Siliguri (DHR edition) Sep 5 *2026*

- Built and demoed Steam-Shed Assistant solo: offline, on-device Q&A (local RAG) over DHR locomotive maintenance documents.

Web Developer with SEO Intern, Blue Minch *Apr 2025 – Jul 2025*

- Built and maintained responsive web pages using HTML, CSS and JavaScript for mobile and desktop.
- Supported on-page optimization for 10+ client websites.

EDUCATION

Inspiria Knowledge Campus, Siliguri – BCA Honours (CGPA: 7.5) *2023 – 2027*
St. Xavier's School, Siliguri – Class XII (76%) *2022 – 2023*

CERTIFICATIONS

HackerRank – Software Engineer Certificate
GitKraken – Foundations of AI for Software Development
