

KARAN PAREEK

Full Stack Developer | MERN Stack

karanpareek174@gmail.com | +91 8101482088 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full Stack Developer (BCA, 2027) who builds and ships MERN-stack applications end to end: REST API design, authentication and access control, real-time systems with WebSockets, Docker deployment, and LLM/AI API integration. Built a self-hosted Git server implementing the Smart HTTP protocol, a multi-tenant real-time collaboration platform, and AI tools using the Claude API. Co-founded Ignitia Digital and delivered 6+ live client websites and web applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C

Frontend: React, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSockets (Socket.io), JWT Authentication, RBAC, PHP

Databases: MongoDB, SQL

DevOps & Tools: Docker, Git/GitHub, Postman, Shell Scripting

AI / LLM: Claude API, LLM Integration, RAG, Prompt Engineering, Cursor, Looping

PROJECTS

[GitStack](#) | MERN, Node.js, Docker, Git Smart HTTP

- Built a self-hosted GitHub clone on a real bare-Git storage engine; git clone, push and pull work directly from the CLI via the Smart HTTP protocol.
- Implemented Issues, Pull Requests with merge-conflict detection and auto-merge, code review, and a social feed.
- Hardened repository access control against path-traversal attacks; containerized and deployed with Docker.

[LiveOps](#) | MERN, Socket.io, JWT

- Built a real-time team collaboration dashboard with live cross-client task sync over authenticated WebSocket rooms.
- Implemented JWT authentication with refresh-token rotation, role-based access control, and workspace-level data isolation for multi-tenant use.

[ReconcileAI](#) | React, Node.js, MongoDB, Claude/Gemini

- Built an AI-driven finance reconciliation system for the Razorpay AI Buildathon 2026 that breaks lumped payment-gateway settlements into order-level GST and fee breakdowns.
- Designed a 3-tier matching engine with human-in-the-loop approvals and an immutable audit log.

[ReviewPilot](#) | GitHub App, Claude API, Node.js

- Built a GitHub App that reviews pull requests automatically using the Claude API and posts inline review comments on the PR.
- Added a developer analytics dashboard to track review activity and code-quality trends over time.

[Steam-Shed Assistant](#) | Local RAG, Offline / On-device LLM

- Built solo at a GDG Siliguri hackathon: an offline, on-device RAG assistant that answers questions from DHR maintenance documents without internet access.

EXPERIENCE

Co-Founder, Ignitia Digital Nov 2025 – Present

- Designed, developed and deployed 6+ client websites and web applications across e-commerce, immigration and education, owning each project from requirements to launch.
- Built with React, Node.js and MongoDB: product catalogs, admin panels, WhatsApp-based checkout flows, and responsive UIs; handled hosting, deployment and ongoing maintenance.
- Implemented on-page and technical SEO (meta tags, page structure, performance) as part of every delivery.

Web Developer with SEO Intern, Blue Minch Apr 2025 – Jul 2025

- Built and maintained responsive web pages using HTML, CSS and JavaScript for mobile and desktop.
- Supported on-page optimization for 10+ client websites.

EDUCATION

Inspiria Knowledge Campus, Siliguri – BCA Honours (CGPA: 7.5) 2023 – 2027

St. Xavier's School, Siliguri – Class XII (76%) 2022 – 2023
